Uncle Sam Says

Did you ever can a United States Savings Bond? Don't answer "no" too quickly because that's what millions of wise Americans are doing daily. By buying bonds regularly through the Payroll Savings Plan where they work or the Bond-a-Month Plan where they bank, they are preserving income for future nourishment. Savings Bonds grow in nutrition value to you and your family through the passage of time. In 10 years they will produce $4 in goodness for every $3 you store away today. Yes sir, the best canning you can do now is the canning of income in the form of Savings Bonds.

Contest Winner "Brands" His Prize

A pioneer of the auto industry, hunted throughout the nation in a contest to discover the oldest Chevrolet truck in America, turned up, appropriately, in the possession of a Montana homesteader. The venerable vehicle, vintage of 1918, was still serving Rancher Leslie A. Storey, of Jordan, Mont., whose ranch lies 18 miles from a typical "last frontier" town. The award for owning the oldest licensed and operating truck was a new Chevrolet "advance-design" model, which Storey "brands" here with his distinctive Circle-Heart brand. It was presented to him by J. W. Burke, manager of Chevrolet's truck department, as Mrs. Storey and Montana cowgirl Merle Spears (right) look on. Nearly 7,000 old-time Chevrolet trucks were entered in the contest won by this vehicle, which was one of 384 built by the division in 1918, its first year of truck production.

A Child Needs More Than The Three R's

"Readin', 'Ritin' and 'Rithmetic" are fundemental, but they aren't sufficient by themselves. A fourth "R" must be added . . Religion. Give your child the religious training which is so vital in developing wholesome living and thinking. Take your child to Sunday School. Sit with him in church. Help him learn his Bible lessons. The church of your faith invites and urges you to come to its services.

REAL ESTATE PRICES CONTINUE HIGH

In another warning to farmers against undue expansion of operation and incurring additional debts, Dr. Harry Love, economist, Agricultural Extension Service, pointed out that farm real estate prices are still on the upgrade with Virginia prices about 100 per cent above the 1941 level.

In some counties, the economist said, prices are up 150 per cent. This is especially true of the bright tobacco section where farms worth $10,000 in 1941 have been selling recently for $25,000. The best available information, he said, indicates that about one-half of these farms are mortgaged for more than 50 per cent of the sale price. On the basis of 1941 conditions, he points out, the holder of a mortgage for 40 per cent of the sale price may expect to own the farm if and when prices return to the prewar level.

Meanwhile, farm labor continues high, with rates up about 210 per cent from prewar. This calls, Dr. Love believes, for increased efficiency in farming and for a wholesale reduction of cash costs. To survive the expected "squeeze," farmers must produce more bushels of corn per acre, more milk per cow, more eggs per hen, and a larger total output per worker.

Scientist Plans to Revisit Town of Stone Age People
